Description

HYDROHROM s.r.o. as a main supplier of electro-mechanical equipment has been founded in 1989, just after velvet revolution in former Czechoslovakia. However Czech tradition in hydro turbine manufacturing and engineering is very old and starts in 19th century. Even famous Kaplan turbine was invented at Czech Technical University in Brno. At present Hydrohrom offers complete range of turbines : KAPLAN, PELTON, FRANCIS covering all possible sites from low heads starting somewhere around 1,5 - 2 m upto high heads reaching some 500 m. The flow variation is very wide too, 10 l/s up to 100.000 l/s. We are specialist for Small Hydro Power Plants so our maximum output limit is 10.000 kW.
